Internship Automation System

Lab 7

Group Name: Group No.3

Progress Made:

a) Application Form Functionality: We are pleased to inform you that we have successfully added the application form functionality to the system. Students can now fill out the form, which will generate a PDF document for them to sign. Afterward, they can submit the form to the Internship Coordinator. Once approved, the Career Center will be notified to initiate the health insurance process for the student.

b) Official Letter: We are delighted to report that the official letter component is nearly complete, with approximately 90% of the work finished. It only requires some final touches to ensure its readiness for implementation.

c) Messaging System: The messaging system is currently in progress. Although we have encountered some challenges, we assure you that they are solvable problems. Our team is actively working on resolving these issues, and we are confident in delivering a functional messaging system.

d) Testing Plan: We have developed a comprehensive testing plan, which is now ready for execution. Our testing team will commence their activities by the end of this week. This will help us identify and address any potential issues, ensuring the system's stability and reliability.

Next Steps:

1. Finalize official letter component and conduct thorough testing.

2. Address challenges with the messaging system and implement necessary solutions.

3. Enhance front-end design for improved user experience.

4. Add extra features to enhance functionality.

5. Gather feedback from the testing team.

We would appreciate your continued support and guidance throughout this project. If you have any specific questions or concerns, please let us know.
